Understanding Taxation

The League of Women Voters believes **that government should maintain an equitable and flexible system of taxation.** The League can only support a method of funding schools that meets this criteria. Thus, it is important to understand some basic principle of taxation and what makes a take equitable.

The Institute on Taxation and Economic Policy has published much information on this topic. More articles may be found at www.itepnet.org.

These two articles are from that Web site. One is a short, two page very basic outline of tax principles. The other is longer and goes into greater detail.
